**o.89 ADD:**

The names must be the same as those on the FIE licences.

**o.90 - REPLACE by:**

Composition of the pools for individual championships

When drawing the pools, the Directoire Technique will take into account the following orders of strength:

1. The 64 highest ranked from the addition of the results in the previous two years Championships, irrespective of age category changes;
2. All other fencers in order of age, starting from the youngest.
3. The allocation of fencers in the pools must be made in such a way as to place fencers of the same nationality, as far as possible, in different pools, by moving them down the ranking as necessary.
4. If in any category there are fewer than ten competitors, the competition is held as a poule unique followed by direct elimination.
5. If in any category there are fewer than 6 competitors, they will fence with the next lower age category. A separate ranking for that category will be extrapolated from the combined categories' final rankings at the end of the competition.
6. If in any category there is only one competitor, the event in that category is cancelled.
7. No fencer is eliminated after the pools, all are entered into the direct elimination.

**o.92 - REPLACE by:**

**o.92 Team championships**

1. Participation

Each country can enter one team per gender and per weapon, thus giving a total of 6 competitions.

2. The rules for team championships are applicable with the following exceptions:
  - a) For each weapon, the teams are composed of three fencers of the same nationality, one from category "A", one "B" and one "C" with or without a reserve for each category. A team cannot begin the match if it is not complete.
  - b) In the case of a team being short of a fencer in any of the weapons the team may use a fencer who has competed in the individual championships at another weapon, but his/her ranking will be deemed to be the last ranking at that weapon plus 1.
  - c) The teams are placed in the pools according to the ranking of the three fencers in the individual championship, the highest place for the team having the lowest total. All the fencers registered for the team event must be present at the piste before the start of the match.

- d). Each team may ask to substitute a fencer before the start of a bout, except in case of injury duly recognized by the Medical delegate, when the substitution can be immediate. There can be only one substitution per match.
3. A fencer who has been replaced because of an injury may not fence again during that match. If both a fencer and the reserve, if any, are forced to retire, or if a fencer is excluded, their team is deemed to have lost the match.
  4. The relay system is always applied. The three fencers of a team fence against their opponent of the same category. Each fencer fences his/her opponent twice giving a total of 6 bouts. The bouts are for 5 hits (5-10-15-20- etc.); the maximum time for each bout is 3 minutes.
  5. The team that first reaches the maximum score of 30 hits, or that which has scored the greatest number of hits after the expiry of regular time, is the winner.
  6. The order of categories for each match is established by the referee with the captains on the piste prior to the start of the match: The referee will "toss a coin" and the winning captain will choose the first category in the order. The losing captain will choose the second category.
  7. The competition consists of a round of pools of 3 or 4 teams, in which all the teams participate, and a direct elimination phase for a maximum of 16 teams; the other teams will be classified according to their place after the round of pools.
  8. If there are fewer than 6 teams, they all fence in a poule unique; a match for the 3rd and 4th places is then held, followed by a match for the first place between the teams who came 1st and 2nd in the pool.
